

What is Dry-Wash?

- Whole Aircraft or part surface cleaning
- Cleaning & Preservation
- Polishing
- No water, washing or rinsing

Why Dry-Wash?

- Nice, shiny surface
- Less drag – less fuel consumption
- Less CO₂ emissions...
- No water pollution
- No hangar required – apron / indoor / outdoor
- During other MX activities

Advantages of the material

- Specially developed for aircraft industry
- Not aggressive (painted, metal, plastic, glass, acryl-glass surfaces)
- Applicable on all surfaces
- For high gloss surfaces also (engine intake, leading edge)
- Removes strong dirt, oil, grease, oxides and burned residuals
- Builds resistant protective film
- No powder or odor remains
- Silicone-free – NO problem later on
- Light manual application
- High humidity application (fog)
- Few support tools needed

Advantages for the Airline

- Appearance
- Washing Cost Saving
- Ground Time Saving
- Fuel Cost Saving
- Environmental friendliness (2x!!!)
- Direct Marketing
- Additional Marketing Possibility
